## Effective Curriculum Delivery Process

The Curriculum delivery is strictly adhering to the Savitribai Phule Pune University Syllabus of 2020 Pattern. The implementation part of the syllabus is moulded as per the requirements and needs of students and the institution. The process of delivering the curriculum is designed at the institution level so that the syllabus will be effectively delivered.

### Preferences Collection from Students for Open Course

After the commencement of the Academic session, the PCC Committee brainstorms for open courses as per organization and market demand. The courses are finalized and the class coordinator is instructed to communicate with the students to select the course.

The procedure for the course is as follows.

1. Preferences are communicated by the class coordinator to the students by conducting the meeting in the presence of the program coordinator and HOD
2. Course syllabus is shared with students and doubts if any from their end are clarified.

### Course Preferences are collected as per Semesters given by SPPU

1. The head of the department invites subject preferences from faculties based on their subject expertise.
2. Allocation of subjects is made by considering the preferences of the Head of the Department and Programme Coordinator.
3. The course for each faculty is communicated to the faculty member.

### Finalization of Courses & Allotments of Faculties by HOD

After finalizing the courses as per the structure defined by SPPU, the faculties will be allotted workload as per designation and experience. Faculties are instructed to prepare course files and lecture execution sheets.

### Preparation of Timetable & Academic Calendar

The timetable is prepared as per the LTP structure. The minimum lecture required to conduct and complete the course is given by the university. By considering the guidelines and the credit associated with the course and the expected lectures required by the faculty, the timetable is designed. Lecture timing per lecture is 60 min.

The Academic Calendar is prepared by the Program Coordinator by considering all the academic structures concerning the Savitribai Phule Pune University (SPPU) academic planner. The academic calendar comprises all the activities right from academics to all activities (co-curricular, extracurricular, sports, and cultural) related to students each semester.

The Practical, Tutorial, and Project parts from the curriculum are also to be considered for timetable designing. Add-on credit courses provision is also taken into consideration while preparing the timetable and academic calendar.

### Making Course Files for each course by the faculty and approved by HOD

After finalizing the courses and allotment of the faculty, the faculty members must prepare the course files for every course considering various aspects associated with the syllabus. The course teacher may modify the LTP of the course given the course requirements, the nature of the course, the level of learners, and the type of pedagogy and assessment tools proposed. The faculty members have to get approval for the course file from the HOD or Programme Coordinator

Email: siddhantical@gmail.com Website: www.siddhantica.in

### Aligning Curriculum Delivery with Academic Calendar

In the course file faculties finalize the concurrent evaluation criteria as per the requirement of the course. Also, the Midterm and End Term examinations will be conducted to evaluate the students for internal marks. All these activities must be aligned with the academic calendar for smooth conduction.

### Feedback on teaching and learning with its analysis

Course feedback is taken twice per semester. The feedback is analysed and discussed with faculty by the head of the department and program coordinator for improvement if any. Feedback is then communicated to faculty by email.

The feedback gets analysed and compared with the performance of the student in the end-term internal examination and will decide if there is any need to take extra guidance lectures, or revision lectures for the respective courses.

### Course End Survey from students on each course

At the end of the semester, a course-end survey is collected by the students for each course.

This survey is collected via a Google form. This survey has questions based on the respective course to ensure that the course has been deeply understood by the student and that the basic crux of the course has been assimilated by the students properly.

### Result Analysis & Next Semester Planning

The result analysis of the students will be done for the entire semester (internal marks + external marks) and based on the performance of the students, the strategies for the next semesters will be defined.
